Kat Yeary

Profile

Full Stack Software Engineer

Skills

MERN, Redux, Javascript, Git, ES6, JQuery, REST APIs, Agile Development, OAuth2, OAuth, JWTs, MySQL, Sequelize, Passport, Handlebars, CSS, Bootstrap, Foundation

Present

Authentication / Project Manager, DataSlate

REST API using MERN stack with Redux. Use JWTs and Google OAuth2 to securely connect administrator, employees and users in a single hub with tiered access to features from sales management to logistics and order fulfillment to purchasing. Successfully meet deadlines and manage project scope by fostering good communication amongst the team, liaising with the client, and ensuring implementation of Agile principles and Scrum meetings.

Experience

MERN Stack Ecommerce Site, itsanimatedtext – Ongoing

RESTful e-commerce, blogging and content-management API using Mern+Redux. Saves the client (a viral digital media artist) significant time and money and increases sales and engagement, by combining her storefront with her Tumblr. Both the storefront and Tumblr environment are CRUD applications, using Stripe for payment processing.

Project Manager, Helpful Only – April 2019 - March 2020

Lead exploratory, development and production phases of a content-marketing initiative for an Online Dating brand. By identifying new content strategies, diversifying content and increasing content production, increase user retention and narrow competition with larger online dating brands.

Director of Client Relationships, RHM Global – April 2010 - April 2012

Lead client retention and sales for a geopolitical reporting service in the finance sector. Increased sales over 100%. Support CEO in editing and reporting capacity.

Education

Full Stack Development Bootcamp - UCLA Extension

Bennington College, Bennington, VT – BA, Comparative Literature & Translation
